

# IBM Research

Maitreyee is IBM Research - India's annual women outreach event with a mission to enable computer science women researchers from academia and industry to collaborate, learn and network with each other. Every year, IBM Research Labs India has been organizing the event to provide a platform for women in computing to network with one another.

- It aims at inspiring women to achieve their professional goals through a host of talks, leadership sessions, panel discussions, and mentoring opportunities.
- This unique initiative aims to bring together the brightest women in technology including students, faculty members, researchers, industry speakers, domain experts, and entrepreneurs, for an active exchange of thoughts and ideas.
- Maitreyee also provides opportunities to enable discussions on how women can successfully grow their technical careers.

This year, Maitreyee shall happen in hybrid mode (physically at IBM Research-Gurugram/ virtually through Webex) on 27<sup>th</sup> September 2022.

## Why should I attend?

- Listen to eminent personalities from industry and academia
- Get opportunity to present your work in IBM Research
- Win exciting prizes in Vlog Competition, Fun quiz and for active participation

We request the nomination of the women students currently in Bachelors, Masters and Post Grad programs to attend this event. Interested students can sign up on the web form here: <http://ibm.biz/maitreyee>. Selected students will be notified for participation.
